

**Globecomm to premier FieldcasterSM
Video Streaming Service at NAB 2015**

Hauppauge, N.Y., April 9, 2015 – Globecomm announces the launch of FieldcasterSM, a new, cost-effective service that originates live broadcasts from anywhere while providing cloud based content management and distribution services. Fieldcaster broadcasts an event from anywhere and streams it live and interactively, then archives and secures the content for on-demand viewing.

Successful beta trials of Fieldcaster have ranged from distance learning to store openings to conferences; with events securely broadcasted to thousands of viewers across North America, Latin America, Europe, Africa, Asia and the Middle East. Fieldcaster eliminates the expense of deploying a satellite truck for event broadcasting by providing a completely portable solution.

“Fieldcaster empowers users of all kinds to do more with live video,” says Ed Behan, Vice President of Media Platforms for Globecomm. “Our service leverages bonded cellular technology to reliably originate high definition broadcasts at dramatically less cost than traditional solutions. We couple this with our intuitive, cloud-based content management platform to enable an endless array of use cases.”

Fieldcaster will be demonstrated in the Globecomm booth SU2721 at NAB 2015 in Las Vegas, April 11-16. To schedule a demo [Click here](#)
