Hosted & Managed Services for Higher Performance with Lower Risk

Globecomm operates state-of-the-art CDMA and GSM hosted cores capable of providing cellular network services from 2G through 4G/LTE, including voice, high speed Internet, SMS, MMS, voicemail, prepaid and post-paid billing, E911 and CALEA. Our Mobile Switching Center offers full redundancy for all major components, as well as dedicated and redundant power and HVAC, 24x7 support from our Network Operations Center and redundant OC3 fiber circuits.

Depending on your needs, your service can be hosted at Globecomm’s Mobile Switching Center, or Globecomm can remotely manage your own core and augment it with the latest services and capabilities from our MSC.

**BENEFITS**
- High Performance from State-of-the-Art Core and Backhaul Network
- Reduced Business Risk with Costs that Scale to Revenue
- Protection from Technology Obsolescence
- Access to Globecomm and Expertise

**FEATURES**
- CDMA and GSM Voice and Data
- Internet, SMS and MMS
- Voicemail
- Prepaid and Post-paid Billing
- E991 and CALEA
Wireless
One Stop—All Your Solutions
Globecomm is a complete end-to-end network management solution provider.

- 24/7 Network Monitoring & Optimization
- Lower Capital & Operating Expenses
- Industry Standard Mobile Switching Center
  - GSM/GPRS/EDGE/UMTS/LTE
