

End-to-end managed service solution for robust X-band communications worldwide

Access Global X meets the military's need for robust X-band satellite connectivity across Asia, the Middle East and Africa through a single, integrated end-to-end solution. From any DISA node, Globecomm provides a managed network service reaching to units deployed in theater, with a single point of contact, accountability and 24/7/365 network support.

Features

■ Satellite connectivity

Globecomm offers capacity on multiple X-band commercial satellites with capabilities including:

- X-band services based on TDMA and DVB-S2 iDirect standards
- High-power service for disadvantaged Manpack 1024 Kbps
- Network options include VNO & Shared networks with CIR's up to 1 Mbps

■ Ground connectivity

Our secure European teleport is a hub on our global fiber network offering redundant and diverse Tier 1 connectivity offering:

- Robust "Inter-Teleport" terrestrial connectivity for DISN access
- Tier 1 connectivity with US or European-based IP addresses
- Voice services with US DID numbers easily supported

■ Satellite Terminals

Globecomm offers a wide range of fixed and mobile X-band satellite terminals for small units up to theater commands.

Globecomm offers satellite and ground connectivity with multiple capabilities.

Benefits

■ Complete Solution

Globecomm's Global Access X in conjunction with Globecomm's X-Band terminal family (Tomcat, Auto-Explorer...) is the only complete X-Band solution commercially available today.

■ High Performance at a Low Cost

Global Access X offers a low cost per unit for secure "always on" service to a deployed unit or warfighter.

■ Meets military standards.

Global Access X equipment is compliant with ITAR, ISO 2005 and MIL-STD-188-164A, and interoperable with the DoD Joint IP Modem (JIPM).

■ Seamless Integration

As a managed service using pre-engineered terminals, Global Access X is available on short notice. The services and terminals integrate easily you're your existing network and applications, extending your capabilities without compromising readiness. They offer high survivability with low risk.

About Globecomm

Globecomm provides end-to-end managed services to meet the communications needs of organizations around the world. We offer a wide range of hosted and managed communications services that leverage our global transmission capacity and our network of data center, content management and switching facilities. Our expert teams can also advise you on the best ways to meet your critical communications needs. We can engineer and integrate individual systems or complex networks, and then support them through the lifecycle. Our engineering expertise has also produced a wide range of satellite terminal products ready for quick and cost-effective deployment. We specialize in providing total solutions that free you to focus on your core mission - whether it is telecommunications, broadcasting, retailing, serving constituents, maintaining security or projecting force. We deliver systems and services anywhere in the world, under any conditions. From secure military applications in a war zone to a hybrid terrestrial-satellite network under tight cost and schedule constraints, our worldwide team gets it done. Our company was founded by engineers and our services and systems are supported by one of the industry's largest in-house engineering staffs.

When we build components and products into our systems, you can count on the fact that we have tested them exhaustively for reliability, compatibility and suitability to your requirements. Our work with suppliers often results in substantial improvements to the products they provide us. And it permits us to make a vital commitment to our customers: that the solution we provide will work - with no excuses, no finger-pointing - no matter what.
