

## The Game is On

Globecomm Network Services is a leading provider of transmission and distribution solution for sports broadcasters. We design and operate state-of-the-art content delivery and cable headend systems both domestically and internationally.

- Broadcasting over 58 MPEG2 and MPEG4 channels
- Over 40,000 hours of broadcast service per month
- 99.99% availability

## Why GlobeComm

- **Content Aggregation & Encoding** - Globecomm operates the Long Island International Teleport which provides aggregation and encoding services, as an option, these functions can also be offered at various broadcast locations. This allows our customers to concentrate on their core business while we concentrate on ours.
- **Content Scheduling, Storage and Playout Services** - Globecomm operates On-air scheduler and playout systems. Services include storage up to 425 GB (~ 200 hours MPEG2 @ 5 Mbit/s), as well as schedule creation and graphic overlays.
- **Robust Teleport Facility** - Globecomm hardened facilities provide robustness at extraordinary value. Globecomm's facilities are designed for 99.99% availability with complete redundancy and automatic fail-over switching.
- **Globecomm offers US Cable Headend Distribution services** on various 'cable-arc' satellites. Our coverage coupled with our teleport facilities and encryption options provide a complete solution for your distribution needs.

Globecomm operates DTH platforms reaching all of Western and Eastern Europe and a large portion of the Middle East. We have direct delivery access into London, Berlin, Jerusalem, Moscow, Cairo, and Baghdad.

Globecomm provides superior quality, reliable and innovative networks.

- Consulting Services
- Design & Integration
- Pre-Engineer Systems
- Manage Network Services
  - Lifecycle Support

## **The Game is On**

Globecomm teleport assets at the Long Island International Teleport, and our fiber connectivity to video distribution networks including Vyvx, AT&T and Genesis allows Globecomm to distribute your content anywhere you want without the need for an “Always on” carrier. Our flexibility even allows us to distribute content on your satellite capacity if you prefer.

## **Infrastructure and System Integrator**

- Master Control
- Media Processing Center
- Headends
- DTH Network

More than a teleport operator, Globecomm is also the largest provider of infrastructure for the world’s satellite communication industry. In addition to satellite centric services, we provide remote monitoring and uplink operations, as well as complete uplink stations in L, S, X, C and Ku-Bands for commercial and government use around the globe.
