

Globecomm to Exhibit at CommunicAsia 2014

Hauppauge, NY – June 17, 2014 – Globecomm, a leading global communications solutions provider, announced today that it will exhibit at CommunicAsia 2014, the information and communications technology (ICT) conference and exhibition in Singapore, June 17-20. Representatives from Globecomm's Singapore, Netherlands, UAE and USA offices will meet customers and prospective customers and strategic partners in Booth 1N1-07 at the Marina Bay Sands Convention Center.

CommunicAsia addresses the entire ICT ecosystem, from 4G/LTE to satellite, machine-to-machine communications to content security. That makes it a perfect match for the broad range of applications and industries served by Globecomm.

Broadcast systems integration is a major strength of the company: new projects include a 10-studio facility in Asia that includes a fiber distribution network, content distribution system, network operations center and disaster recovery facility. But Globecomm is also a leader in maritime voice and data, mobile network integration and hosted mobile switching. Experts on all of these applications and technology solutions will be available at Globecomm's booth.

About Globecomm

Globecomm Systems Inc. is a leading global communications solutions provider. Employing its expertise in emerging communication technologies, including satellite and other transport mediums, Globecomm is able to offer a comprehensive suite of system integration, system products, and network services enabling a complete end-to-end solution for our customers. Globecomm believes that its integrated approach of in-house design and engineering expertise combined with a world-class global network and its 24 by 7 network operating centers provides it a unique competitive advantage. Globecomm focuses this value proposition in selective vertical markets, including government, wireless, media, enterprise and maritime.

As a communications solutions provider Globecomm leverages its global network to provide customers managed access services to the United States Internet backbone, video content, the public switched telephone network or their corporate headquarters or government offices. Globecomm currently has customers for which it is providing these solutions in the United States, Europe, South America, Africa, the Middle East and Asia.

Based in Hauppauge, New York, Globecomm also maintains offices in Maryland, New Jersey, Virginia, the Netherlands, South Africa, Germany, Singapore, the United Arab Emirates and Afghanistan. For more information, please visit www.globecomm.com
